Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Receipt is acknowledged of the Amendments filed 11 July 2003.

Election/Restrictions

Newly submitted claim 15 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1-14, drawn to a picture display device, classified in class 313, subclass 440.
- II. Claim 15, drawn to the process of scanning within the picture device, classified in class 348, subclass 196.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of scanning within the display tube could be performed within a display tube having a cone portion whose internal cross-section has a ratio which is less than the ratio of the display screen.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 15 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Objections

Claim 4 is objected to because of the following informalities:

- line 3: "envelop"; should be --envelope--.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-14 are allowed over the prior art.

The following is a statement of reasons for the indication of allowable subject matter: The best prior art of record discloses a cathode ray tube having a cone portion wherein a deflection system is attached to the cone portion, the cone portion has an internal outline which has a long axis/short axis ratio which is smaller than the long axis/short axis ratio of the display screen of the cathode ray tube. However, the prior art

fails to teach or fairly suggest at least one cross-section of the cone portion with an internal outline which has a long axis/short axis ratio which is larger than or equal to the long axis/short axis ratio of the display screen of the cathode ray tube as claimed in claim 1. Claims 2-7 are allowable by virtue of their dependency.

The best prior art of record discloses a cathode ray tube having a cone portion wherein a deflection system is attached to the cone portion, the cone portion has an internal outline which has a long axis/short axis ratio which is smaller than the long axis/short axis ratio of the display screen of the cathode ray tube. However, the prior art fails to teach or fairly suggest an electron beam envelope wherein the long axis/short axis ratio of the envelope is greater than the long axis/short axis ratio of the display screen of the cathode ray tube as claimed in claim 8. Claims 9-14 are allowable by virtue of their dependency.

Conclusion

This application is in condition for allowance except for the following formal matters:

As shown above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
